

# NAVIONICS+

## Expedition Navigation Software and Navionics Cartography

This guide is for the installation of Navionics+ digital cartography for use with compatible Expedition Navigation Software versions (v12+).

**Purchase** Navionics SD/MicroSD cards: [www.fieldyachting.com/category/all-products](http://www.fieldyachting.com/category/all-products)

Instructions to activate and update charts: [www.navionics.com/gbr/my-card/activate-update](http://www.navionics.com/gbr/my-card/activate-update)

Adding Navionics+ or Platinum+ charts to Expedition:

1. The SD chart card must be mounted as a drive on a PC. A third-party SD/MicroSD to USB adapter may be required.

2. In Expedition, on the **Charts** Ribbon

- a. click **Navionics**
- b. click **System**

3. Select '**Cartridges**'

- a. In Drive, select your SD chart card
- b. Click **Install**.
- c. Once complete, the SD chart card may be removed from the PC.

### Notes:

- Expedition, with an activated and installed Navionics chart, must be started at least once with an internet connection to register your PC with Navionics.
- SD chart cards may be installed on up to 5 PCs. To deregister PCs, contact Navionics support.
- Multiple chart cards may be installed. Removing a region does not delete the charts, and they can be added back to the chart list from the Expedition data directory.
- Chartcards updated with Navionics **Chart Installer** must be re-installed.
- Boating App subscriptions and SD chart cards are not compatible, even if on the same Navionics account.
- The SD chart card may be used with compatible chart plotters. Check compatibility at [www.fieldyachting.com/navionics](http://www.fieldyachting.com/navionics)
- Navionics SD chart cards come with a 1-year subscription to chart updates from the date of activation.
